## Belpex FTP Server to Go-Live

Belpex FTP server is to go-live in production on the 15th November 2014.

### The Belpex Historical Data

In response to requests from Participants with regards to receiving historical data, Belpex has developed a new way to obtain this data. The former option was to have an account on the Belpex Website, participants were then able to login and download our hourly prices and volumes via the web interface.

Following the need expressed from Participants to make this data download more suitable for automatic updating, Belpex will now launch the FTP server facility. On the FTP server the data is automatically updated after every clearing. Participants can connect to the server and download the data there. Hence the web interface is not necessary anymore. Once a login on the FTP server is received, even a tool will be able to perform the login.

The price for this service is 1500 €/year for non-Belpex Participants, and is offered free of charge for the Belpex Participants.

To obtain access to the FTP server, please contact your account manager.

### Contact details

If you have any questions, please feel free to contact any of the following:

#### Commercial enquiries

Natasa Miljus | Account Manager
